***Reason For Allowance***

The following is an examiner's statement of reasons for allowance:

1. Applicant arguments filed on Nov 02, 2004 are considered persuasive in regard to patentability over the prior art of record. As per claim 1, None of the prior art of record teach or suggest a method for collecting statistical traffic data comprising steps of:

detecting an SYN segment from a traffic in one of two directions on the Internet line;

detecting a DATA segment, which belongs to same connection as the detected SYN segment, from said traffic; and

obtaining at least one of an amount of transmitted segment at a side which sent the detected SYN segment, and an amount of transmitted bytes at said; wherein said amount of transmitted segment being obtained by counting a amount of said detected DATA segment, and said amount of transmitted bytes being obtained by calculating difference between a sequence number of the first detected DATA segment, and a sum of a sequence number of the last detected DATA segment and a user data length of said last detected DATA segment.

This functionality is supported by the specification at pages 15-23, Fig 2-9.

2. Claims 2-8,10-12 contain the similar limitations set forth of apparatus claim 1. Therefore, claims 2- 8,10-12 are allowable for the similar rationale set forth in claim 1.

Art Unit: 2142

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
